The market gap in the "Super-Premium" cat litter segment has created a strong opportunity for innovative products engineered with advanced manufacturing techniques.

This technology enables the development of high-performance litters that deliver excellence in reliability, hygiene, and home-environment comfort.

Super-Premium products have proven their superiority through laboratory development and real-world testing, demonstrating outstanding results in both user satisfaction and health-focused performance.

"9 OUT OF 10 RATING" IN REAL USER BETA TESTS: Backed by over 40 years of academic experience and intensive R&D, natural sepiolite mineral has been processed using advanced engineering techniques into an innovative product in the "Super-Premium" segment. Following laboratory development, this product proved its excellence in home-environment field beta trials with cat owners, scoring a 9 out of 10 Satisfaction Rating.

✦ SUPER-PREMIUM PRODUCT ADVANTAGES

- **99.9% Dust-Free (Special Surface-Lock Technology):** Completely eliminates airborne dust during pouring and usage, making it unmatched for cats with asthma and respiratory sensitivities.
- **Molecular Odor Shield:** Does not mask odors with artificial perfumes; prevents ammonia gas formation at the molecular level. The litter remains completely odor-free even after extended use.
- **-20% Lightweight Structure:** 20% lighter than standard clay litters, offering superior logistics, shipping, and handling ergonomics.
- **Early Health Monitoring:** Its bright natural white/ivory structure allows cat owners to easily spot urine color changes for early health and blood tracking.
- **Zero Tracking / Non-Stick Paws:** Eliminates the problem of litter scatter throughout the home.

★ WHY IS THIS A UNIQUE OPPORTUNITY FOR INVESTORS?

- **Exceptional Profitability (68%+ Gross Margin):** Super-Premium segment product margins commanding high retail prices despite low raw material and manufacturing costs.
- **< 3M Ultra-Fast Payback:** Optimized fixed capital expenditure (CAPEX) with the potential to recover the invested capital in less than 3 months.
- **Turnkey Project & Ready Plant Architecture:** Complete plant engineering—from raw material processing to final product, automation, packaging, mass balances, machinery lists, and process design—is fully ready.
- **Certified & Ready Know-How:** Plant setup, commissioning, and product quality are guaranteed directly by the scientist who developed the technology.

COLLABORATION & CONTACT — CONFIDENTIAL INVESTOR DOSSIER

Investors and entrepreneurs interested in commercializing this high value-added product, building a manufacturing plant from scratch, or acquiring the Know-How/Licensing rights are invited to contact our company/site management for a detailed Investor Feasibility File and sample requests. (Discussions and data sharing will be conducted directly with the developer scientist under a Non-Disclosure Agreement - NDA).
